

20th International Symposium on Applied Electromagnetics & Mechanics ONLINE 5-8.06.2022 | Thessaloniki, Greece

CONFERENCE PARTNERS' SCHEME

ISEM2022 – 20th International Symposium on Applied Electromagnetics & Mechanics offers an extensive sponsorship scheme for the online conference.

Official partners are invited to support the Organizing Committee to create a successful conference and –at the same time- to benefit from brand awareness and contacts throughout the meeting.

We have designed different partnership options so you can choose what would best promote your company/institution.

❖ SPONSOR

Mark your company's presence in the conference with some low budget but high efficiency options.

There is a wide array of benefits to sponsors: *logo placement in the electronic material and communication, an advertisement in the digital program that will be sent out, and banners on the platform of the event* are some of our suggestions. For higher sponsorships levels, we will be happy to discuss your preferred tailored benefits.

❖ EXHIBITOR

A *virtual* exhibition will take place in the conference platform of the ISEM2022 Symposium. Choose a 2D booth that best suits the needs of your company and find yourself among the participants attending the conference. All companies or institutions that are somehow linked to applied electromagnetics and mechanics or wish to support research on this field in Europe, are encouraged to exhibit at the *online* conference. Among the rest, one representative of the exhibiting company will benefit from free attendance of the conference.

20th International Symposium on Applied Electromagnetics & Mechanics **ONLINE 5-8.06.2022 | Thessaloniki, Greece**
